

Quantum
Computing
Academy

with the patronage of

CeSMA (*Advanced Metrological and Technological Service Center*), **University of Naples Federico II** and **QuantumNet** (*a NetCom Group company*) launch, with the patronage of **Campania Region**, the first edition of

QUANTUM COMPUTING ACADEMY

WHAT

QCA is a training project that aims to:

- the acquisition of basic knowledge of **quantum computing**;
- the introduction to quantum **computer programming**;
- the usage, in the various application domains, of the knowledge learned in class.

WHEN

Starting **next autumn** with a program that includes **344 hours**: 200 in laboratory and 144 of project work in collaboration with our partners.

WHERE

The Academy will be hosted within the **Campus San Giovanni a Teduccio of the University of Naples "Federico II"**, where students will have equipped laboratories for theoretical and practical lessons.

WHO

The Academy provides a path oriented to **I and II level graduates** with a prevalent scientific-technological background (sciences, technology, engineering).
